

Easy • Configurable • Cost-effective

The Professional Grade & Installer Friendly Outdoor Rink Board Systems

ISO 9001-2008

Versa Rink Pro™ Mobile Versatility

The **VersaRink Pro™** is a very flexible dasher board system which can be configured for a wide range of uses. Whether you are looking for typical hockey rink design or to create a circuit in your city park, the **VersaRink Pro™** modules come in a wide range of curves and heights to fit your space. The **VersaRink Pro™** boards are quick and easy to install and dismantle to relocate or to store away.

The **VersaRink Pro™** advantages:

- Installs and dismantles quickly with only two people
- Quick and easy to re-locate and/or store
- Various heights available: 8", 12", 16" and 24"
- Eight foot length modular sections in various curves
- High grade construction with high quality UV stabilized Puckboards
- Compact storage with optional custom pallets
- Stainless steel components and 3/8" aluminum frame
- Easily installs on wide variety of surfaces and stays put
- Professional high quality finish
- Can be used 12 months per year

Versa Rink Pond™ Simplified Multiplicity

The **VersaRink Pond™** is designed specifically for pond hockey tournaments. This board system assembles and dismantles in a very short time. The single median boards mean you don't need as many components for a multi-rink configuration. The innovative attachment affixes directly in the ice so the boards stay in place even during the most energetic games.

The **VersaRink Pond™** advantages:

- Installs and dismantles quickly with only two people
- Quick and easy to re-locate and store in a compact space
- 6" board height
- Eight foot length modular
- Compact storage with optional custom pallets
- High grade construction with high quality UV stabilized Puckboards
- Stainless steel components and 3/8" aluminum frame
- Attachments install directly on ice surface
- Professional high quality finish

Kan-Rink Advantages

Ease of installation

Our outdoor recreational equipment experts have designed the Kan-Rink systems to be easy to install and maintain. Our innovative modular components reduce setup and dismantle time and only require two people to install. Our innovative anchoring options make sure everything stays in place on virtually any type of surface.

Custom Applications

The Kan-Rink boards are offered in 4 distinct product lines to adapt to virtually all levels of outdoor rink board requirements. Choose from our standard kits or add modular components to meet your size and performance needs. We also have a custom design program to accommodate extremely specific installations.

Designed for the outdoors

The Kan-Rink™ board systems have been engineered for product expansion and perform in extreme weather conditions: from our hot summer days to our coldest winter months. Using only professional grade components and our outdoor recreational equipment expertise, we have put the Kan-Rink products through years of extensive testing under the harshest conditions.

Budget Friendly Solution

The Kan-Rink boards are a sound investment that will save time and money:

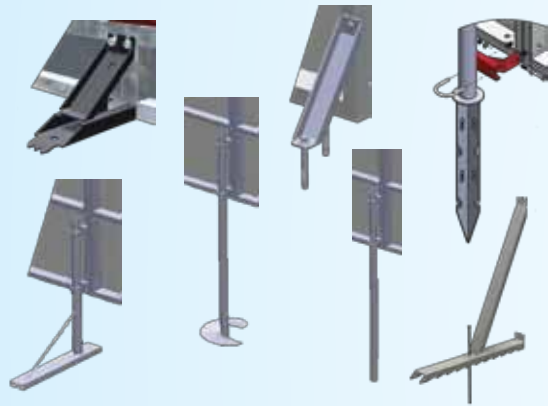

- The modular design is easy to understand and requires only two people to install or dismantle.
- Various innovative anchoring systems for quick and easy installation on specific types of terrains and substrates.
- The outdoor-engineered product and professional grade components provide a 20-year product life.
- Components nest tightly together and take up minimum warehouse space for off-season storage.
- Modules can be added after purchase to expand the design or upgrade components without having to replace the entire system.

Specifically Engineered for Northern Climate!

- From winding skating circuits to complete year-round full size rinks
- Innovative time saving ease of installation design
- Full range of anchoring options for virtually any type of surface

Innovative Anchoring

For any type of surface

Stay Closed Doors

Multi Sport Use

DURA Rink Pro™

Permanent Outdoors

The **DuraRink Pro™** is designed for permanent installation with its heavy-duty components and is engineered to accommodate extreme material expansion. Easy two people installation on a wide variety of surfaces. This full rink design has many optional components available such as player and utility doors, player and penalty boxes, protective mesh, etc. **DuraRink Pro™** can be utilized for a variety of sports such as tennis, soccer, basketball and lacrosse.

The **DuraRink Pro™** advantages:

- Permanent year-round use designed to withstand maximum expansion due the North American climate
- “Stay Put” anchor systems are easy to install on grass, earth, concrete and asphalt
- Low installation and maintenance costs
- Simple and quick two people installation
- Available in custom sizes
- Corrosion resistant stainless and galvanized steel hardware
- Installs and dismantles quickly with only two people
- Aluminum 1-1/2” x 3” frame construction
- Resistant UV stabilized Puckboards
- Safety Shock absorbing boards
- Stay closed doors

DURA Rink Mobile™

Strong Maneuvrability

The **DuraRink Mobile™** was designed as a strong and durable rink board system, which can be easily dismantled for relocating or compact storage. The innovative anchoring systems enable the boards to be installed on a wide variety of surfaces. Base kits and custom sizes available. Extensive list of optional components such as player and utility doors, player and penalty boxes, protective mesh, and others. The **DuraRink Mobile™** can be utilized for a variety of sports such as tennis, soccer, basketball and lacrosse.

The **DuraRink Mobile™** advantages:

- Solid durable construction designed to withstand maximum expansion due to North American climate
- “Stay Put” anchor systems are easy to install on grass, earth, concrete and asphalt
- Low installation, dismantle and maintenance costs
- Compact storage with optional custom pallets
- Simple and quick two people installation and dismantle
- Corrosion resistant stainless and galvanized steel hardware
- Installs and dismantles quickly with only two people
- Aluminum 1-1/2” x 2” frame construction
- Resistant UV stabilized Puckboards
- Safety Shock absorbing boards
- Stay closed doors
